

Abstract

SYNERGISTIC ANTIFUNGAL DDAC COMPOSITIONS

---

5

The present invention relates to synergistic antifungal compositions comprising didecyl ammonium chloride (DDAC) and a post-harvest antifungal agent selected from the group consisting of imazalil, boscalid, fenhexamid, pyrimethanil, thiophanate-methyl, triflumizole, azoxystrobin, dimoxystrobin,

10

picoxystrobin, and pyraclostrobin for protecting plants, fruit or seeds against phytopathogenic fungi.
